PROFILE

Master's degree in Electrical Engineering specialized in hardware, firmware, and embedded systems. 2+ years professional experience in embedded systems design, PCB development, and IoT solutions.

WORK EXPERIENCE

Embedded Systems Engineer

Self-Employed, Milan | Apr 2025 - Present
Designing network of smart devices with mesh networking and IoT. Implementing AI features and voice interfaces. Engineering modular add-ons ([Smart Home](#)).

Embedded Systems Engineer

OTTI s.r.l.s, Milan | May 2024 - Feb 2025
Developed modular system for boat panel modernization ([Smart Panel](#)). Integrated ESP32, GSM, RTC, and NMEA. Designed compact PCBs.

Embedded Systems Engineer

Toos Bio Research Co., Mashhad | Jan 2022 - Sep 2022
Upgraded stereotaxic system and designed lab device controls. Developed motorized system for eye tracker ([Lab Equipments](#)).

Electronics Engineer Intern

Bartar Andishan Co., Mashhad | Jun 2019 - Aug 2019
Gained hands-on experience in electronics and embedded systems development.

EDUCATION

MS in Electrical Engineering

Politecnico di Milano | Sep 2022 - Apr 2025
Specialized in hardware and embedded systems. Developed expertise in firmware design, PCB development, and system integration.

BS in Electrical Engineering

Ferdowsi University | Sep 2016 - Sep 2021
Foundation in electrical engineering principles. Completed coursework in electronics, embedded systems, and control systems.

TOOLS & FRAMEWORKS

- Programming Languages:** C, C++, Python
- Hardware Description Languages:** VHDL, Verilog
- PCB design software:** EasyEDA, Altium Designer
- PLC:** Siemens SIMATIC STEP 7, Siemens LOGO, Delta PLC
- Frameworks:** MATLAB, LabView, PSpice, Proteus
- Tools:** Git, Excel, $\LaTeX$, Miro, VS Code, ModelSim, VIVADO, Quartus, Arduino IDE, Keil, STM32Cube
